CyberPlanet has the possibility to access the billing information in the database in real time. For this a group of Views configured on the MySql server are available.

Connection to MySql base

User: admin_reportes
Port: 51897

Password:

- CyberPlanet 6.5.0.110 or preview:
  The password is that of the user "admin" of CyberPlanet.
- CyberPlanet 6.5.0.112 or later:
  The password is configured in PC Menu Server, Configuration, Security, Administration/Operators, "Remote Access to Views"

Data access

View: view_tickets

Returns the tickets issued.

Field	Type	Comment
TicketNo	INT(11)	Ticket number, auto-incremental.
CashNo	INT(11)	Box number on which the ticket was issued
Cashier	VARCHAR(20)	Cashier's Name
CategoryINT	INT(11)	id Category
CategorySTR	VARCHAR(100)	Category
Quantity	INT(11)	Quantity
Details	VARCHAR(103)	Details
unit_price	DECIMAL(22,8)	Unit price
Discount	DECIMAL(19,4)	discount amount
total	DECIMAL(18,4)	Total receivable
DateTime_consumed	DATETIME	Date and time of consumption
DateTime_ticket	DATETIME	Date and time of ticket issuance
duration	TIME	Duration, in the case of meetings
pc	SMALLINT(6)	Number of PCs of consumption
PosNo	INT(11)	POS number. "0" is PC Server.

A ticket can contain multiple records, so it must be grouped by 'TicketNo' field to know the total of each ticket.

Examples:

1) Tickets with your cash amount 1
SELECT ticketNo , SUM(T.total) AS Importe from view_tickets T WHERE T.CashNo=1 GROUP BY ticketno

Table of categories of tickets

codigo	detalle
1	Uso PC Anónimo
3	Recarga crédito Cliente
4	Uso Operador
5	Servicios
6	Impresiones
7	Escaneo
8	Abonos
9	Grabaciones
10	Descuentos
11	Ticket PIN
12	Ventas eliminadas
13	Descuentos Abonado
15	Ajuste por redondeo
16	Desc. Cantidad Impresiones
17	Carga crédito anónimo
18	Notas de crédito
19	Promociones
20	Pase Libre
21	Nuevo Cliente Registrado
22	Uso PC Registrado
23	Pago de Deuda
24	Deuda a Pagar
25	Tarjeta PIN
26	Pago de consumos con crédito
10.000	Productos

View: view_notascredito

Returns the credit notes issued.

Field	Type	Comment
TicketNo	INT(11)	Ticket linked to credit note
CashNo	INT(11)	box number
Cashier	VARCHAR(20)	Operator performing the NC
Details	VARCHAR(640)	Comments added to the NC
number	INT(11)	Credit note number
total	DECIMAL(18,4)	Amount of the CN
DateTime	DATETIME	Date and time of issue.

Credit notes are always associated with a ticket.

Example: All credit notes in box 1

SELECT * FROM view_notascredito WHERE cashNo = 1

Situations to consider

- Tickets filtered by date may not be the same as tickets filtered by box number:
  Example: If a box closes the day after it opens. Ex 2: If there is more than one box (turn) on the same day.
- Views are available only on Mysql databases installed on CyberPlanet server PC (Local base).
- Additional Income or Expenses that may be part of a shift are not accessible since integration.
